Senior Mathematics 26 week STUDY PLAN

Unit 1	Subject matter	Assessment
	(sub topics)	(Progress tests
		summative)
Week 1	Special forms, Simplifying expressions,	Activities: 1.1 – 1.5
Topic 1: Some algebraic	Functions and combining functions	
forms Topic 2: Introducing		
Functions		
Week 2		
Week 2	Polynomial functions The absolute value	Activities: 1.5-1.15;
Topic 3: Special Functions		
Week 3	Graphs of rational functions, inverses of	Activities: 1.16-1.20
	mathematical functions, Continuous and	Progress Test 1
	discontinuous functions	
Week 4	Growth functions, interest rates and the	Activities: 1.21-1.26
Exponential functions and	exponential function, the special number <i>e</i> ,	
logarithms		
Week 5	decay function, the laws of logarithms,	Activities:
		1.27-1.29
		Progress Test 2

Unit 2	Subject matter	assessment
Week 1 Topic 1: The Straight Line	Two points in the plane, displacements, length of a line segment, gradient of a line segment, parallel and perpendicular line segments, mid point of a line	Activity 2.1-2.7
	56 <u>5</u>	

Week 2 Topic 1 Con't Topic 2: The Circle and other curves	The straight line, standard form of a straight line, some special straight lines, The circle, the ellipse	Activity 2.8-2.15
Week 3	The hyperbola, the parabola. Conic sections,	Activity
	tangents and normal lines	2.16-2.19
		Progress Test 1
Week 4	Rotations, trigonometric ratios, Identities	Activity
Topic 3: Trigonometry		2.19-2.30
Week 5	radian measure and applications, Periodic	Activity
Topic 4: Periodic functions, their graphs and applications	functions, their graphs and applications	2.30-2.46
Week 6	Inverse trigonometric functions	Activity
		2.47- 2.52
		Progress Test 2

Unit 3	Subject matter	Assessment
Week 1 Topic 1: rates of change and the derivative	Describing change with graphs, rate of change, the gradient function, the derivative, functions without derivatives	Activities 3.1-3.7
Week 2	the derivative con't, functions without derivatives	Activity 3.7-3.14
Week 3 Topic 2: Derivatives of	Exponential and logarithmic functions,	Activity 3.15-3.19

trigonometric, exponential and logarithmic functions		Progress Test 1
Week 4	Maxima and minima, identifying maxima and	Activity
Topic 3:	minima, Optimisation problems	3.19 - 3.26
Optimisation problems		Progress Test 2
Week 5	Rules for differentiation, combinations of	Activity
Topic 4: Graphs and	functions, higher derivatives	3.27 – 3.38
mathematical models		
Week 6	higher derivatives con't, approximate	Activity
	solutions	3.39-3.46
		Progress Test 3
Week 7	Anti-derivatives, notation, rules for finding	Activity
Topic 5: The integral	integrals, the integral at a point	3.46-3.54
calculus and applications		
Week 8	area as an integral, (incl. approximating	Activity 3.55-3.60
	definite integrals)	Progress Test 4

Unit 4	Subject matter	Assessment
Week 1	Recurrence relations, convergence,	Activity
Topic 1: sequences and series	arithmetic sequences, sum of arithmetic sequences, geometric sequences, sum of geometric series	4.1-4.7
Week 2	Present value of an ordinary annuity,	Activity
Topic 2: Financial	amortisation of a loan	4.9-4.11
mathematics		Progress Test 1
Week 3	Probability in data analysis, the tree	Activity
Topic 3: Probability in data	diagram, probability of an event, Summary of probability rules, counting rules	4.11-4.20

analysis	(permutations and combinations)	
Week 4	Probability distributions for counting data, the binomial model, counting and measuring data, continuous probability distributions	Activity 4.21-4.29
Week 5	The uniform distribution	Activity
Topic 4: Probability Distributions		4.30-4.36 Progress test 2
Week 6	Revision	Exam
Week 7
